

## **Report on student dropout insights.**

### **Overview**

This report discusses the insights from the analyses of student data, focusing on demographics, academic performance, and dropout rates.

### **Key insights**

#### **1. Dropout rates:**

- About half of the student population in the dataset drop out from higher institutions.
- There was also a visible relationship between admission grades and dropout rates.

#### **2. Academic performance:**

- Students with higher admission grades tend to graduate and those with less grade dropout.

#### **3. Financial factors**

- Students that have fully paid their tuition fees have a higher chance of graduating compared to those that have not paid in full.

### **Conclusion**

The analyses show the importance of academic performance and healthy financial situation in student graduation success.
